He not only showed up promptly, he was extremely helpful, and understanding, not only with trying to jump my diesel truck, (which it turns out BOTH batteries were needing complete replacement) but he spent ample time attempting to get my truck up and running again before we called it quits! AND upon payment I didnt have zelle or cash and he patiently followed me to the gas station *fail* so another store to pull out cash for him. So I def recommend this towing service, and I personally will be using for any and all towing needs in the future while still living in EP! Thank you sir!

Mr. Ramiro was so helpful and nice! He really helped me out of a bind. He came quickly and it wasnt expensive at all. My car was not being cooperative but he knew his stuff and was able to get my car towed. Definitely would recommend.

My car broke down on my way to work, I called Towing of El Paso. They were fast, efficient and provided great customer service. The quote was affordable for the distance I needed to go. I will definitely be saving their number for future incidents.

Called about a specialty hauling job, although he couldn't help me with it, he took the time to give me a couple of numbers for others that could. Very good customer service over the phone. They will be my go to towing service due to his interaction with me.
